

AXICA. VISION & MISSION

OUR VISION

AXICA's overriding goal is to make a significant contribution to the sustainable change of our society for a better future by 2024.

A holistic environmental management in all areas, lived diversity as a self-conception and social commitment of all employees are the cornerstones of our company. In addition, by then at least 50% of all events held with AXICA will have been meaningful and value-oriented.

OUR MISSION

We are an event location with premium catering in the heart of Berlin, directly at the Brandenburg Gate. Thanks to our high culinary quality standards, our tailor-made services, our creativity and our impressive architecture created by the international star architect Frank O. Gehry, AXICA has been one of the best and most popular service providers in the capital for more than 20 years.

We are a passionate team that lives diversity and takes on the daily responsibility of actively shaping the future of our society. The protection of our environment, social commitment, the use of sustainable and preferably regional products as well as the dialogue with our stakeholders are therefore part of our self-image.

Our daily interaction is based on absolute trust, because we are all united by the common goal of changing our society for the better and thus giving our (professional) life a deeper meaning.

We work with great enthusiasm in interdisciplinary teams in order to learn from each other and achieve the best possible financial and ideological results for our clients, partners and DZ BANK.

Our focus is on people. Our structures are flat and transparent - this also includes the wage structure. We strive for a 32-hour week without overtime. We train to inspire the next generation with our ideas and thoughts. And we take care of each other by designing our workplace together and making it a favourite place for each of us. At the same time, we regularly question ourselves and our partners so that we can continue to develop. We are courageous and allow ourselves to fail. However, we always keep an eye on our risks.

We think outside the box, value creativity and are constantly improving our skills. We encourage each other to develop new formats and to be better tomorrow than today. We share what we have learned with our stakeholders in order to inspire them, too, with the idea of holistic sustainable management and to walk the path together.

We live the "meaning of encounters", work in networks and use both our location as well as our collected know-how as hub and designer for meaningful and value-oriented events.

This gives AXICA a new profile with international appeal.
